

DVS_NWSec_RAU_NIGHTLY Testsuite
working principle and logic

Author: metin.hasanov@siemens.com

Each test will be executed for each device mentioned in **Devices=**

Test suite **Name="ProjectEngineering" ProductName="RAU" ContinueAfterFailure="true" RetryAttempt="3"**

ProjectEngineeringTest

ProductName="RAU"

Covered devices are mentioned in ns01 TestBed (DXR2.E18-1 / DXR2.M18-1)

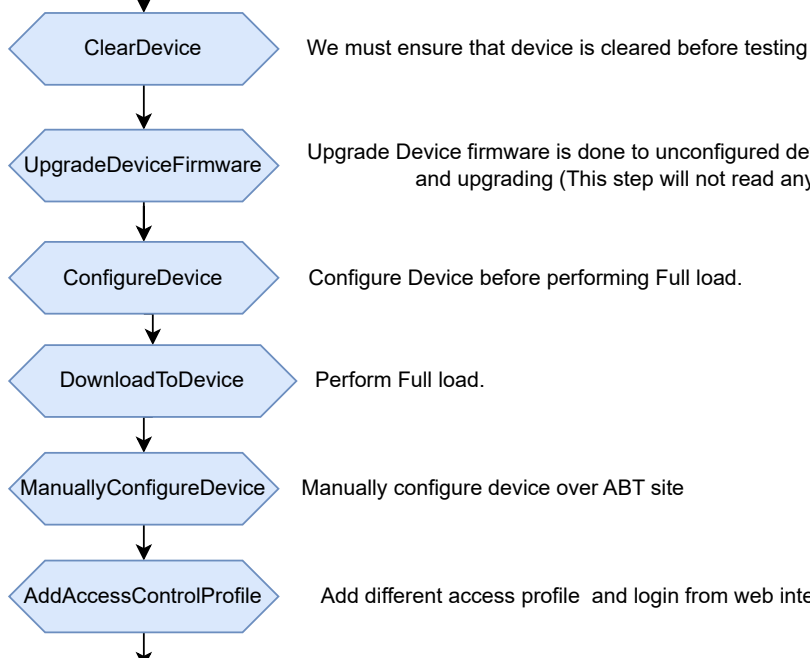

Test suite **ProductName="RAU" Devices="PXC" Transports="Ethernet" Protocol="IP" Addressings="StaticIP"**

SetupABTSiteForTestRun

Prepare Project for testing by opening it and expanding the project tree
Note: After opening the project it will connect to network based on **Transport** ,
Protocol, Addressing,

Test suite **ProductName="RAU" Devices="DXR2.E18-1" Transports="Ethernet" Protocol="IP" Addressings="StaticIP"**

Each test will be executed for each device mentioned in **Devices=**

Test suite

ProductName="RAU" Devices="PXC" Transports="Ethernet" Protocol="IP" Addressings="DHCP"

SetupABTSiteForTestRun

Prepare Project for testing by opening it and expanding the project tree
Note: After opening the project it will connect to network based on **Transport** ,
Protocol, Addressing,

Test suite

ProductName="RAU" Devices="DXR2.E18-1" Transports="Ethernet" Protocol="IP" Addressings="DHCP"

ClearDevice

We must ensure that device is cleared before testing

ConfigureDevice

Configure Device before performing FW upgrade.

UpgradeDeviceFirmware

Upgrade Device firmware to configured device and read BACnet properties

DownloadToDevice

Perform Full load.

ManuallyConfigureDevice

Manually configure device over ABT site

AddAccessControlProfile

Add different access profile and login from web interface

ClearApplication

Clear application from ABT site

ClearDevice

After using device we must Clear it

Each test will be executed for each device mentioned in **Devices=**

Test suite

ProductName="RAU" Devices="PXC" Transports="USB" Protocol="MSTP" Addressings="Local"

SetupABTSiteForTestRun

Prepare Project for testing by opening it and expanding the project tree
Note: After opening the project it will connect to network based on **Transport** ,
Protocol, Addressing,

Test suite

ProductName="RAU" Devices="DXR2.M18-1" Transports="USB" Protocol="MSTP" Addressings="Local"

ClearDevice

We must ensure that device is cleared before testing

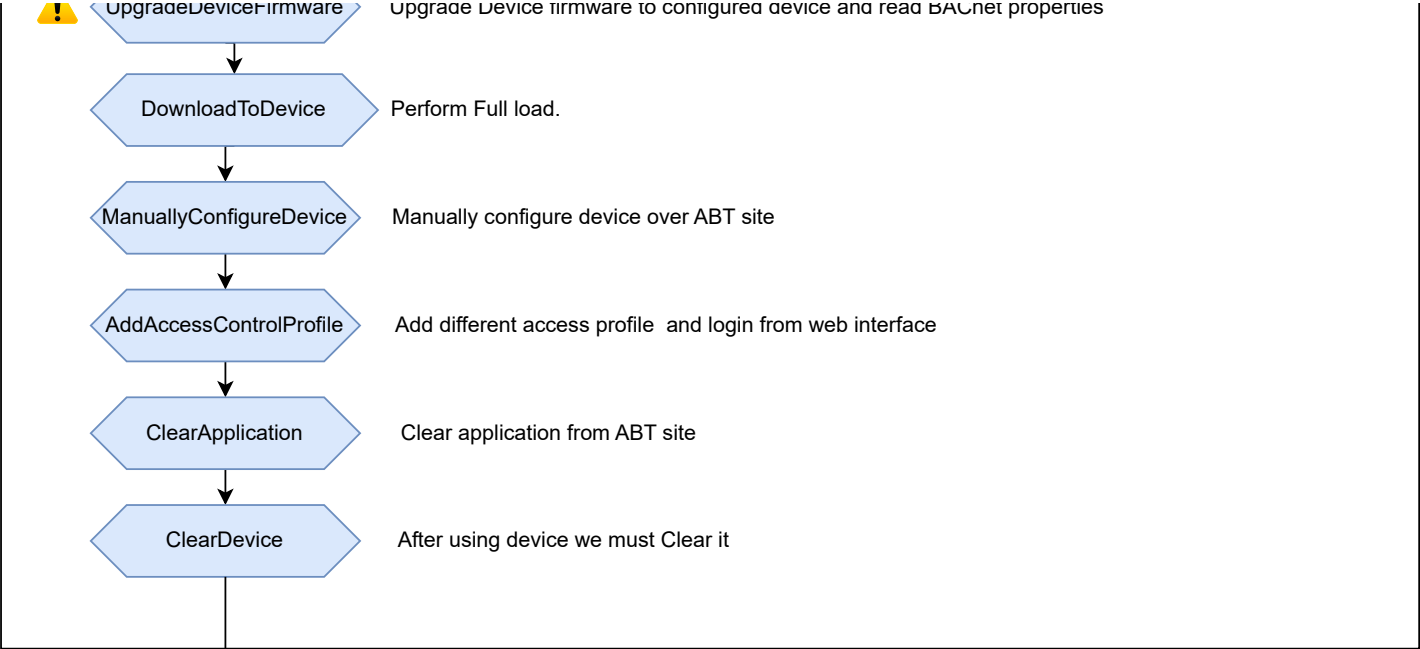

ConfigureDevice

Configure Device before performing FW upgrade.

UpgradeDeviceFirmware

Upgrade Device firmware to configured device and read BACnet properties

Each test will be executed for each device mentioned in **Devices=**

Test suite	ProductName="RAU" Devices="PXC" Transports="USB" Protocol="MSTP" Addressings="Local"
